

FORMETCO SOUND SYSTEMS

An essential part of a great LED Video Scoreboard is the sound. Investing in a great sound system with your new LED Video Scoreboard completes the package for a high impact system that will excite your fans and vastly improve your event experience for everyone.

FORMETCO SOUND SYSTEMS

ABOUT OUR SOUND SYSTEMS

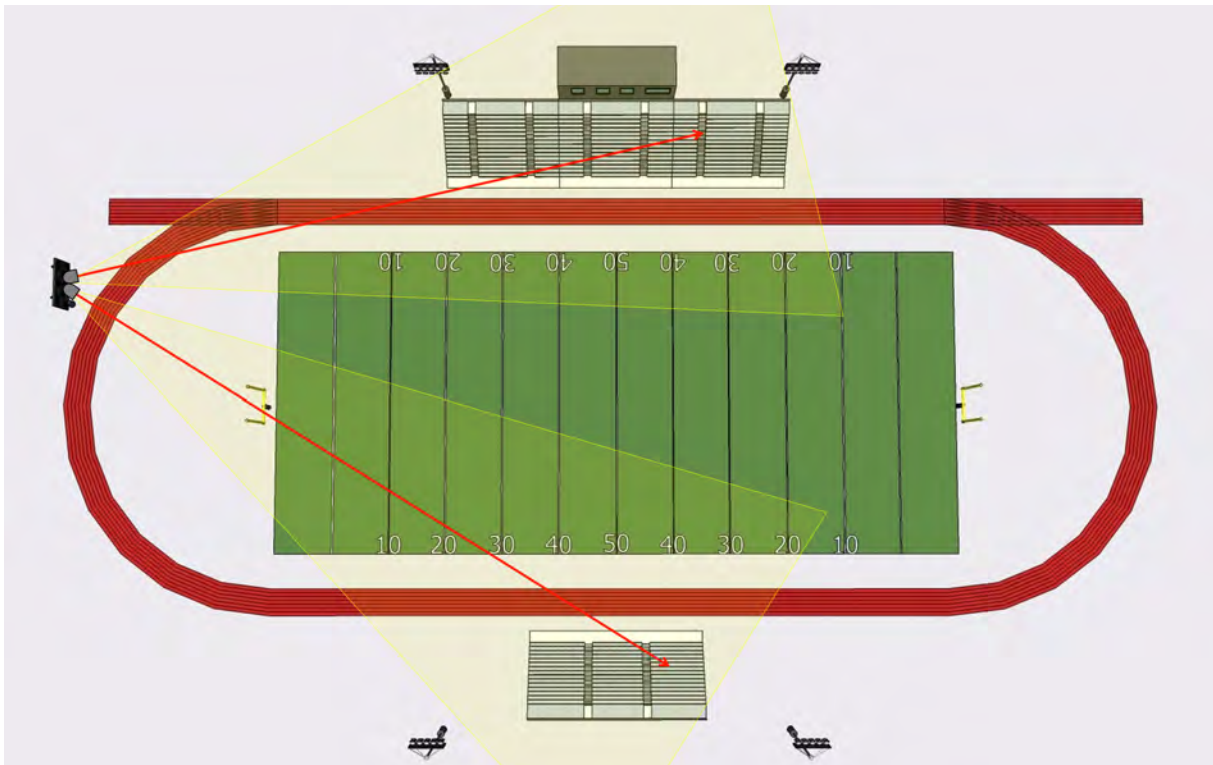

Formetco offers a full range of sound systems designed specifically for your facility's needs. Starting with a site survey of your facility, factoring in any special requirements unique to your program, Formetco will develop a complete computer generated sound analysis.

Formetco manufactures custom speaker enclosures, decorated speaker covers, providing a complete system including installation.

OPTIMAL LOCATION

For most stadiums under 20,000 seats, the best location for your sound system is on your LED Video Scoreboard. We also recommend that if you are not getting a sound system with your initial installation of a LED Video Scoreboard that your structure be designed and engineered to hold an audio system that can be installed on it in the future.
